# WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No. PCT/GB2008/051042

	Bo	x N	o. I Basis of the opinion				
1.	With regard to the language, this opinion has been established on the basis of:						
		a t pu	ranslation of the international application into , which is the language of a translation furnished for the rposes of international search (Rules 12.3(a) and 23.1 (b)).				
2.		Th by	is opinion has been established taking into account the <b>rectification of an obvious mistake</b> authorized or notified to this Authority under Rule 91 (Rule 43bis.1(a))				
3.	Wit nec	With regard to any <b>nucleotide and/or amino acid sequence</b> disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:					
	a. t	ype	of material:				
	ł		a sequence listing				
	į		table(s) related to the sequence listing				
	b. f	orm	at of material:				
	I		on paper				
	☐ in electronic form						
	c. time of filing/furnishing:						
	[		contained in the international application as filed.				
	[		filed together with the international application in electronic form.				
	[		furnished subsequently to this Authority for the purposes of search.				
4.		na co	addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto is been filed or furnished, the required statements that the information in the subsequent or additional pies is identical to that in the application as filed or does not go beyond the application as filed, as propriate, were furnished.				
5.	Add	litio	nal comments:

#### Re Item V.

Reference is made to the following documents:

- D1: WO 2005/082546 A (PURSUIT DYNAMICS PLC [GB]; FENTON MARCUS BRIAN MAYHALL [GB]; HEATHCOTE) 9 September 2005 (2005-09-09)
- D2: WO 94/08724 A (CASEY ALAN PATRICK [AU]) 28 April 1994 (1994-04-28)
- D3: WO 01/76764 A (CHROBAK JULIUS [SK]) 18 October 2001 (2001-10-18) cited in the application
- D4: WO 03/072952 A (PURSUIT DYNAMICS PLC [GB]; TODMAN MICHAEL TORR [GB]; FENTON MARCUS BRI) 4 September 2003 (2003-09-04)
- D5: US-B1-6 405 944 (BENALIKHOUDJA KARIM [FR]) 18 June 2002 (2002-06-18)
- 1. Coaxial nozzles for providing a mist of a liquid by entraining the liquid from one channel into a gas moving at high velocity in another channel is well-known [vide D1-D5].
- 1.1 D1 discloses several designs for such nozzles, some of which comprising a throat portion in the center fluid channel which has a smaller cross sectional area than both the inlet and outlet of said channel. The area ratio between the throat portion and the outlet is not explicitly mentioned, but could be assumed to be within the range of 2:3 to 1:4. The inclination between the center channel and the surrounding channel(s) appears to be in the range of 15-25 degrees [figures 16-19, 21]. In any event it is evident to the skilled person that various characteristics of the droplet formation may be obtained by varying the angle [See corresponding text to the figures on pages 42-45]. The device according to D1 can be used to generate a mist if a disinfectant [page 63, 1st §]. It is also foreseen that the outer channel may have a throat portion [see the figures].
- 1.2 Accordingly, at least the subject-matter of independent claims 1, 15, 28, 29 and 34-36 lacks novelty (Art. 33(2) PCT).
- 2. A similar disclosure is found in D2 [page 12, lines 14-23; page 15 lines 13-21 and figures] (Art. 33(2) PCT). Admittedly, D2 does not explicitly mention the use of the

device for sterilising purposes but rather for use in a combustion engine. Nevertheless, the device can be considered suitable for such purpose and alternative uses in general have been implied [page 1, lines 8-10].

- 3. Dependent claims 2-14, 16-27 and 30-33 do not contain any features which, in combination with the features of any claim to which they refer, meet the requirements of the PCT in respect of novelty and/or inventive step.
- 3.1 In said claims only slight constructional change in the subject matter of the independent claims are defined and which come within the scope of the customary practice followed by persons skilled in the art, especially as the advantages thus achieved can readily be foreseen. Consequently, the subject-matter of said dependent claims at least lacks an inventive step (Art. 33(3) PCT).

Possible steps after receipt of the international search report (ISR) and written opinion of the International Searching Authority (WO-ISA)

## General information

For all international applications filed on or after 01/01/2004 the competent ISA will establish an ISR. It is accompanied by the WO-ISA. Unlike the former written opinion of the IPEA (Rule 66.2 PCT), the WO-ISA is not meant to be responded to, but to be taken into consideration for further procedural steps. This document explains about the possibilities.

# under Art. 19 PCT

Amending claims Within 2 months after the date of mailing of the ISR and the WO-ISA the applicant may file amended claims under Art. 19 PCT directly with the International Bureau of WIPO. The PCT reform of 2004 did not change this procedure. For further information please see Rule 46 PCT as well as form PCT/ISA/220 and the corresponding Notes to form PCT/ISA/220.

## Filing a demand for international preliminary examination

In principle, the WO-ISA will be considered as the written opinion of the IPEA. This should, in many cases, make it unnecessary to file a demand for international preliminary examination. If the applicant nevertheless wishes to file a demand this must be done before expiry of 3 months after the date of mailing of the ISR/WO-ISA or 22 months after priority date, whichever expires later (Rule 54bis PCT). Amendments under Art. 34 PCT can be filed with the IPEA as before, normally at the same time as filing the demand (Rule 66.1 (b) PCT).

If a demand for international preliminary examination is filed and no comments/amendments have been received the WO-ISA will be transformed by the IPEA into an IPRP (International Preliminary Report on Patentability) which would merely reflect the content of the WO-ISA. The demand can still be withdrawn (Art. 37 PCT).

## Filing informal comments

After receipt of the ISR/WO-ISA the applicant may file informal comments on the WO-ISA directly with the International Bureau of WIPO. These will be communicated to the designated Offices together with the IPRP (International Preliminary Report on Patentability) at 30 months from the priority date. Please also refer to the next box.

# End of the international phase

At the end of the international phase the International Bureau of WIPO will transform the WO-ISA or, if a demand was filed, the written opinion of the IPEA into the IPRP, which will then be transmitted together with possible informal comments to the designated Offices. The IPRP replaces the former IPER (international preliminary examination report).
